

Question 1: Grade Evaluation System

Scenario:

Write a program that takes an integer score as input and determines the grade based on the following criteria:

- Grade "A" if the score is 90 or above.
- Grade "B" if the score is between 80 and 89.
- Grade "C" if the score is between 70 and 79.
- Grade "D" if the score is between 60 and 69.
- Grade "F" if the score is below 60.

Constraints:

- $0 \leq \text{score} \leq 100$

Input:

An integer score.

Output:

The corresponding grade as a single character.
